

High Resolution Inkjet Fluids

IIMAK is your source for high-quality inkjet fluids which meet or exceed the OEM standard. Now, you can reduce your replacement ink costs with products engineered to 100% compatibility. Aggressive filtration standards deliver superior performance and maximize system uptime. IIMAK inks deliver excellent print quality on porous substrates including corrugated case coding, lumber, leather, ceramic tile and Tyvek®.

OEM Equivalent High Resolution Inks for:
Videojet/Marsh® | Diagraph® | Foxjet® | Domino® | Matthews® | and others
Most Gen 1 & 2 Trident® | Xaar® Print Engines

- Significant savings on direct replacement inks that produce crisp, clear barcodes and text with excellent adhesion to corrugated cartons and other porous surfaces.
- “Pour-over” inks save time and eliminate waste as they do not require the system to be flushed before use.
- High Resolution inks are filtered to less than 1 micron for a high degree of purity assuring reliable system operation.
- Prints high quality verifiable UCC/EAN 128, 12 of 5 and other tall barcodes
- Bottles, caps and other packaging engineered for direct OEM replacement.
- Developed and manufactured in the USA.
- Fast shipping with most popular items in stock.
- Custom ink formulation for your special application requirements.
- 100% satisfaction guaranteed

Choose from a variety of direct replacement fluids in OEM equivalent packaging for quality imprints, high speed capability, and excellent adhesion.

IIMAK is Your Source for Inkjet Fluids
